EDUCATION

Year	Period	Name	Location
2013-2019	Elementary school	Xingfu Road Primary School	He Bei
2019-2025	High School	Xingfu Road High School	He Bei
2025-2026	University	Tsinghua University	Bei Jing

SELF-INTRODUCTION

•As an undergraduate female student majoring in Automation at Tsinghua University, I maintain solid academic performance and a rigorous research mindset throughout my studies. I have built a sound foundation in control theory, C++ programming, embedded systems and data analysis, and taken part in multiple academic research and engineering practice projects. I excel at cross-team collaboration and logical problem-solving. During campus competitions and student work, I served as a group leader many times, coordinating task allocation, communicating progress and pushing teams to deliver high-quality results under tight deadlines. Detail-oriented and self-motivated, I stay persistent when tackling complex technical challenges. Outside coursework, I engage in volunteer activities and technical sharing sessions to broaden my vision. Eager to integrate theoretical knowledge with real industrial scenarios, I am ready to learn rapidly, take on responsibilities and bring steady, reliable performance to your team.

AWARDS HONORS

- **Excellent Student Leader Award** Aug 2025
University Student Union
 - Honored for organizing academic sharing events and coordinating team volunteer activities
 - Demonstrated strong communication and task coordination capabilities
- **National College Student Mathematical Modeling Competition Second Prize** Mar 2026
Ministry of Education
 - Led a 3-person team to build data analysis models and deliver complete research reports
 - Applied statistical algorithms to solve practical social operation optimization problems

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python
- **Tools and Frameworks:** Jupyter, Visual Studio
- **Operating Systems:** Windows, Android

KEY COURSES TAKEN

- **CSE & Maths:** Introduction to C, Fundamentals of Computers, Object Oriented Paradigm in C++, Data Structures and Algorithms, Python Programming
- **Others:** Engineering Drawing, Digital Electronics, Principle of Engineering Economics and Management

RESEARCH INTERESTS

- Intelligent Control & Embedded System
- Data-Driven System Optimization & Statistical Modeling
- Robot Perception & Multi-Agent Collaborative Algorithm

POSITIONS OF RESPONSIBILITY

- **Member of Student Union Academic Department,** Tsinghua University 2025
- **Volunteer Team Leader,** University Volunteer Association 2026
