

Sheng Feng

student from Department of Automation

I really like solving real-world problems with mathematical modeling methods and computer programs. I am also fond of the human recognition process and its relation with artificial intelligence. Please admit me to PK University!

SKILLS

Basketball	philosophy	math modeling	Hard work	Cpp and Python
Self learning	psychology	Team work	Any softskill	

EDUCATION

Department of Automation

🏛 Tsinghua University 📅 2025 – 2029 (Beijing, China)

- AGI training program
- Current GPA: 3.9

Artificial General Intelligence

🏛 Tsinghua University 📅 2029 – ? (expected)

SELF-INTRODUCTION

I'm always eager to learn new things, from mathematics to programming, from physics to English. I excel at scheduling my self-learning process, controlling the pace to maintain interest and enthusiasm. I thrive in team environments, mapping general plans and exchanging ideas with teammates.

My research passion lies in applying mathematical modeling and AI techniques to solve real-world problems. I am particularly interested in the intersection of embodied intelligence and multi-agent systems, exploring how AI agents can interact with humans and environments effectively. My long-term goal is to contribute to the development of beneficial AGI that serves humanity.

Beyond academics, I enjoy playing basketball, reading philosophy, and exploring the cognitive processes behind human decision-making. These diverse interests enrich my perspective and inspire my research.

RESEARCH INTERESTS

Machine learning <i>the ideas behind various frames</i>	Embodied intelligence <i>interact with human or other AI</i>	philosophy <i>what's "value"?</i>
Math modeling <i>the bridge between reality and virtual env</i>	Biochemistry <i>how to live longer?</i>	Materials science <i>Robust material supports embodied intelligence</i>

AWARDS

Robot Dog Contest <i>Third Prize</i>	Agent Contest <i>Third Prize</i>	National Math Modeling Contest <i>Not yet begin</i>
